

# WHAT IS IT?

TruGreen Fusion Bamboo Madagascar is a unique composition of mostly black dyed strands of MOSO bamboo and thin layers of carbonized strands of MOSO Bamboo. The bamboo is crushed, hand dyed and then layered together for a truly unique appearance. It is then infused with a dense VOC-free resin and finally cold-pressed for optimum stability. MOSO Bamboo is the highest quality bamboo available for flooring. Greenwood MOSO Bamboo is harvested from the exclusive Anji Mountain Region of China and carefully selected at the peak of maturity between 5 to 6 years. The core of this product is Greenwood's unique TruGreen Advantage core. This core is 100% engineered MOSO bamboo in a cross-fillet format with special "thread" that intertwines each individual fillet. This "thread" allows for slight expansion and contraction in the core as well as increased precision in the manufacturing process. Overall, the TruGreen core construction provides the most stable platform on the market while still maintaining its status as 100% Rapidly Renewable Resource.

## MADAGASCAR Fusion Bamboo TruGreen

### PRODUCT SPECS

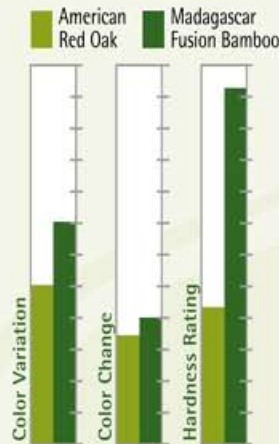

- THICKNESS** ..... 9/16"
- WIDTH**..... 5"
- LENGTH** ..... 72 3/4"
- WEAR LAYER** ..... 4.0mm
- EDGE**..... Micro Bevel
- CORE**..... TruGreen Engineered Bamboo Core

### FINISH

Klupp Miraphen Aluminum Oxide with Anti-Scratch Top Coat

### INSTALLATION

Glue, Float or Staple/Nail

### COLOR VARIATION

Madagascar Fusion Bamboo features moderate color variation with carbonized strands

### GRAIN VARIATION

Madagascar Fusion Bamboo features moderate grain variation

### COLOR CHANGE

Madagascar Fusion Bamboo will experience little to no color change over time (Dyed and stained product)

### HARDNESS

3270 PSI

### WARRANTY

**Lifetime** Structural  
**30 Year** Residential Finish  
**5 Year** Commercial Finish

*Environmentally Responsible,  
 Quality Conscience,  
 Fashion Inspired,

## ENVIRONMENTAL INFORMATION

### LEED® CREDITS

**MR 6:** Rapidly Renewable Materials

GreenWood Fusion Bamboo products qualify as MR6 (Rapidly Renewable Materials) as they are made with 100% MOSO bamboo, a rapidly renewable resource.

**EQ 4.4:** Low-Emitting Materials

GreenWood Fusion Bamboo products are manufactured with LEED EQ 4.4-compliant adhesive.

### ENVIRONMENTAL IMPACT

Adhesives used in manufacturing of GreenWood products have Zero Added Urea Formaldehyde and comply with standards set by U.S. OSHA, European E0 and CARB (California Air Resource Board) Phase 1 & 2. GreenWood Fusion Bamboo products also feature high quality VOC-free resins and finishes.
